CONNECT TO EARN

Roshambo is your go-to socializing app that provides an unmatched experience in connecting you with new people and earning in the form of cryptocurrency. Unlike conventional social media platforms or connecting apps, Roshambo is built on a community-driven business model where connections and users come first. Leveraging the blockchain and crypto technology, with Roshambo, we are taking quantum leaps in terms of transparency, connecting accuracy based on interest, and data protection. The idea of finding a friend on the blockchain is a novelty.

However, the Roshambo is more about its unique concept of giving a fair chance to earn and is way more than brandishing itself as a trailblazer. The more you connect, the more you earn well ofcourse until you don't want to anymore. You are free to trade roshambo coins and enjoy the perks of connecting with the world.

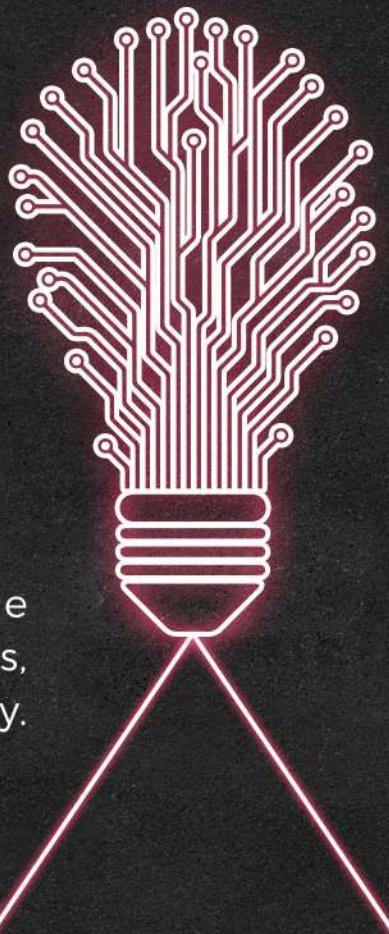

In the world of the internet, social applications have become popular among youngsters and Roshambo acknowledges that interest. In the era where virtual reality is a new comfort zone, Roshambo creates a safe, secure space for connecting with anyone you want. Incorporating blockchain allows us to solve various problems with typical centralized popular socializing sites and apps. It assures the transparency that the DLT (distributed ledger technology) of blockchain brings in along with eliminating the risks of identity thefts and extortion.

Roshambo brings in a fresh perspective to online connectivity. It's open for everyone who awaits company or money, in this case, you get both. We are creating a social platform that makes conversation happen in every way possible in the best interest of users.

VISION

Roshambo's vision is to create a space where people can be themselves, find the right connections, socialize with freedom and spend time in a fun way. Additionally, they earn and grow as a community.

MISSION

Our mission is to connect the world beyond socializing, a space where you meet like-minded people, earn and grow as a community.

STORY BEHIND

ROSHAMBO

The idea of connecting with new people has always been exciting. The parties, dinners, colleges, social groups followed by different communities on the internet. This past decade has been the journey from having friends to adding more people as your friends. We all want to connect more and more people with different or similar interests. The pandemic was a wave of connection with the world as everyone felt that we all are in the same situation. However, we felt that it wasn't the lack of apps where people can connect but originality and transparency that one seeks when they are looking for connections. We wanted to bring an application that ensures compatibility, freedom to be yourself, and a bond that doesn't end in monotonous likes and comments. Roshambo stands for rock paper scissors leaving equal odds to win, or lose the chance of earning. Giving a head start to a competitive and fun bond.

Roshambo understands the need for an honest, and fresh vibe with connecting with people you like. It is beyond finding a friend, it's rather a space for connecting minds and vibes. At first, every time you choose to connect is every time you get to earn roshambo coins. Moreover, you have a reliable space where you can trust users and technology that's built on transparency.

WHAT MAKES
ROSHAMBO
UNIQUE?

MORE IMPROVED CONNECTIONS

The idea of integrating blockchain and artificial intelligence into an application where people connect with each other will be able to experience better recommendations and improved algorithms that suggest who is more likely to get along. Instead of just relying on the pictures for calculating the compatibility ratios, blockchain uses other parameters also to assess the compatibility ratio, interests, monitor behaviors, searches, and genuine details of a user. It does not just give them better choices but also a space where they can truly explore themselves.

TRANSPARENCY

The most important thing about incorporating blockchain in the Roshambo is the transparency that the DLT (distributed ledger technology) of blockchain brings in. Since this is a decentralized system, there are no prying eyes of any centralized authorities for the users. Perhaps every piece of the information that the users share on Roshambo will be open to view by other users. This allows everyone to see how the exchange is rated by others so that he can improve upon areas that others think he would improve in.

ELIMINATES THE RISK OF IDENTITY THEFTS

Blockchain sure eliminates the risks of identity thefts and extortion. There are many cases reported about how these social media platforms are used to extort money and victimize innocent people, however with Roshambo you can rely on us about everything. We understand the importance of hard-earned money and time, and hence we are here with a greater purpose than just connecting you with the world.

IMPROVED SECURITY

Roshambo is built on pillars of new ideas, technology and core concepts of blockchain that can solve security issues by using public-key cryptography. All this is similar to the digital signatures on bitcoin transactions. With the help of cryptographic keys, we ensure that the profiles are verified before they appear on our app. This makes Roshambo a much safer space to connect with a wider audience.

A WAY TO EARN

As we mentioned Roshambo is beyond the application that connects, it is not just a place to find your mates. In fact, with the enactment of blockchain and artificial intelligence, you can also earn subsequently in cryptocurrencies. Where you can build a community of like-minded people and be someone who enjoys the perks of new ideas of the social world on the internet. Every time you decide to connect, grow your community, and refer to your groups, it's your way to earn more Roshambo Tokens.

ROSHAMBO

TECH RATE AUDIT

The token supply & liquidity distribution has been strategically planned to optimize the success of the project and in turn, benefit our investors. The token is built on the Ethereum Chain and the total token supply is 50 Billions. Roshambo will be reviewed and successfully passed our TechRate audit. Results show no bugs, coding errors, and other potential security exploits. It ensures the legitimacy of a project out in the Wild West of the blockchain world.

TOKENOMICS

Token name: Roshambo

Token symbol: ROS

Token supply: 50,000,000,000 ROS

Token Pair : ROS/ETH

The project is funded by Private VC's and Roshambo will be Incorporated in the near Future. Hence, There is no Buy/Sell fees as well as No Team/Marketing Wallets.
